TITLE INDEX

Aromatic substrates, catalysed bromination of (Kothandaraman and others), 144.

Atmosphere, non-uniform, self-similar strong shocks in (Rao and Chaturani), 30.

Basaltic rocks, a single domain grain model for the low-field constricted hysteresis loops of some (Radhakrishnamurty and Sastry), 94.

Celestial X-ray source Sco X–1, gamma radiation from the (Apparao), 103.

Complex space, symmetric dual quadratic program in (Gupta), 74.

Electron density—height profile in the ionosphere, rocket borne instrumentation for the measurement of (Degaonkar and others), 236.

ESR study of irradiated single crystal of *p*-toluidinium chloride (Krishnamurthy and Venkataraman), 155.

Florachromes: their chemical nature and spectroscopic behaviour (Raman), 1.

Flow, hydromagnetic, between two parallel, porous plates (Vidyanidhi and Rao), 272.

Flow of a viscous incompressible fluid between two parallel flat plates, one in uniform motion and the other at rest, with unsteady pressure gradient (Dube), 205.

Fox's H-function and Bessel function, some results involving (Bajpai), 42.

Fractional integrals of the functions of two variables (Mourya), 173.

Gamma-rays, atmospheric, of 1–200 GeV over Hyderabad (Stephens), 214.

Gamma-rays, incoherent scattering of, by K-shell electrons of platinum (Reddy and others), 185.

Ionization of some substituted 4-methyl-thioanilines, thermodynamics of (Shanmuganathan and Vanajakshi), 149.

Micropolar fluid contained in a visco-elastic membrane, wave propagation in (Renuka Ravindran and Girija Devi), 108.

Muon, multiple, events observed underground (Krishnaswamy and others), 55.

$NaClO_3$ and $NaBrO_3$, crystals of, thermal variation of the rotatory power of (Madhava), 67.

Naphthalene derivatives, chromic acid oxidation of some, transition state in the (Srinivasan and others), 261.

Optical absorption of Co^{2+} doped NH_4Cl: phase transformation studies (Narayana and Venkateswarlu), 249.

Oxidation of aldehydes by aqueous Ce (IV) in nitric acid (Rangaswamy and others), 292.

Oxidation of simple phenols by phenyl iodoso acetate (Mathai and Rengarajan), 47.

Oxidation, studies in, XII (Anantakrishnan and Varadarajan), 197; XIII (Varadarajan), 266.

Physiologically active compounds, search for, XVIII (Rao and Rao), 24.

Plasma, cylindrical, stability of a, in the presence of a monotonic field, II (Narasimha Murthy), 134.

Positron annihilation in annealed and quenched teflon and in sulphur (Kulkarni and others), 88.

Pulsar MP 0450, period and declination of (Mohanty and others), 246.

Pulsars, solar cycle theory of (Apparao and Chitre), 285.

Radiation, is the '8° K' background, universal ? (Anand and Apparao), 62.

Sequence space $l(p_n)$, a note on the (Somasundaram), 36.

Vinyl polymerisation, X (Padma Vasudevan and Santappa), 279.

Viscous heat-conducting gas, effect of impulsive change of wall velocity and wall temperature in (Pandey), 121.
